

Scientific Monitoring will exhibit at the 2011 MRO IT Conference and Showcase
October 20-21, Chicago, IL

Visit us at **Booth 317**

<http://www.sci-mon.com>

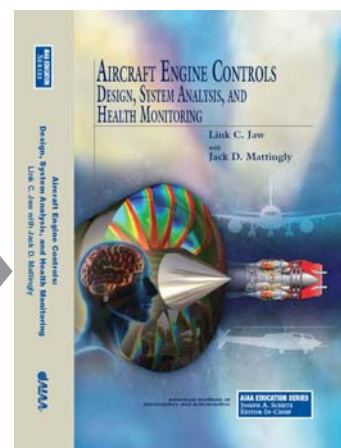

Learn how SMI's Condition Monitoring software **iTrend**[®] and **iPredict**[®] can help you

- Stay on top of incipient problems in engines and other aircraft equipment.
- Reduce schedule interruptions and improve reliability.
- Recover lost revenues.
- Improve availability and efficiency.

Visit our booth (#317) and enter the drawing for the AIAA Education Series book:

Aircraft Engine Controls: Design, System Analysis, and Health Monitoring, by Link C. Jaw with Jack D. Mattingly

**Win a signed copy of this book
Two drawings each day**

This Aviation Week Conference's MRO IT event will be a day and a half conference with the focus on:

- Innovative takeaways to streamline their IT-enabled MRO operations
- Real-world strategies and tactics on combating IT challenges
- Opportunity to hear about key changes in repair technologies/systems and understand the impact of these developments
- Sharing of best practices from airlines and MRO organizations
- Showcase of latest advances in IT systems and technology enablers
- Neutral environment to discuss customer needs and availabilities. Forum to work together in finding a beneficial product to both parties
- Information to simplify MRO technologies and systems
- Knowledge and intelligence on future strategy and planning
- Learn how to leverage IT to streamline operations, the supply chain, enterprise management and more

For details of the Conference, please visit: <http://www.aviationweek.com/events/current/mroit/index.htm>
