## **SMI Supports Boeing-led Sensor Prognostics and Management System (SPMS) Program for FAA**

SMI has been working with the Boeing Company Team since January 2010 on a Federal Aviation Administration (FAA) sponsored program, called Sensor Prognostics and Management System (SPMS). This program explores advanced sensor and communication technologies to facilitate condition-based maintenance (CBM). SMI is providing consulting on prognostics and CBM strategies for the team.
